DIMENSIONS	42 mm
CIRCA	1987
ORIGIN	Switzerland
LIMITED	79/99
ORIGINAL BOX	
ORIGINAL CERTIFICATE	
GUARANTEE CARD	
ACCESSORIES	
ORIGINAL CLASP	Gold

The special limited-edition Broad Arrow models highlight the two salient features of this timepiece: the "Broad Arrow" hands of the original Speedmaster watch (reproduced in 18-carat gold on these models) and the Omega column-wheel chronograph movement.

The Broad Arrow's unique hands are set off by a collection of watches in pink, yellow and white gold with an authentic enamel dial, bearing the limited-series number. The OMEGA calibre 3320 is visible behind a transparent screw-in sapphire crystal case back, which bears the inscription "SPEEDMASTER ENAMEL LIMITED SERIES" and the limited-series number. The movement has a platinum rotor with an 18-carat gold Speedmaster medallion that matches the colour of the watch case. Like the column-wheel chronograph mechanism, the enamel dial is also a rare feature, since it is difficult to produce and is available only from a limited number of manufacturers. The appeal of this watch is increased yet further by the highly restricted production run of 99 watches in each gold colour, making this limited edition a highly sought-after timepiece.

The limited-edition Broad Arrow models are a must for those who admire the illustrious heritage of Omega's legendary Speedmaster watch and who appreciate the very finest in the art of prestige watchmaking.

Certificate of Authenticity

The heart of the Speedmaster Broad Arrow is undoubtedly the new movement developed by OMEGA and produced exclusively for OMEGA by Frédéric Piguet. The new calibre is a self-winding COSC-certified chronometer movement which benefits from the latest in watchmaking technology. Its column-wheel chronograph mechanism consists of a ratchet wheel with columns that govern the precision operation of various levers for the chronograph functions: start, stop and reset for the central chronograph seconds hand and the hour and minute totalisers (located at 6 o'clock and 3 o'clock respectively). Column-wheel chronographs are widely recognised as the finest chronograph movements available. However, they remain exclusive, since very few manufacturers are capable of producing this highly sophisticated mechanism. The exclusiveness of OMEGA's new movement is further enhanced by the proven OMEGA sprung-balance without index, which offers improved regulating stability.

The special limited-edition Broad Arrow models highlight the two salient features of this timepiece: the "Broad Arrow" hands of the original Speedmaster watch (reproduced in 18-carat gold on these models) and the new OMEGA column-wheel chronograph movement. The Broad Arrow's unique hands are set off by a collection of watches in red, yellow and white gold with an authentic enamel dial, bearing the limited-series number. The OMEGA calibre 3320 is visible behind a transparent screw-in sapphire crystal case back, which bears the inscription "SPEEDMASTER ENAMEL LIMITED SERIES" and the limited-series number. It has a meticulous finish with Geneva wave decor, circular graining, rhodium-plated surfaces, gold-plated engraving, blue-steel screws and a polished bevelled chronograph module with smoothed upper surfaces. The movement has a platinum rotor with an 18-carat gold Speedmaster medallion that matches the colour of the watch case. Like the column-wheel chronograph mechanism, the enamel dial is also a rare feature, since it is difficult to produce and is available only from a limited number of manufacturers. The appeal of this watch is increased yet further by the highly restricted production run of 99 watches in each gold colour, making this limited edition a highly sought-after timepiece.

The limited-edition Broad Arrow models are fitted with a hand-sewn alligator leather strap with 18-carat gold foldover clasp matching the colour of the case. In addition to the screw-in transparent case-back, an OMEGA double gasket crown guarantees water resistance to a depth of 100 metres. They are a must for those who admire the illustrious heritage of OMEGA's legendary Speedmaster watch and who appreciate the very finest in the art of prestige watchmaking.

Your Speedmaster Broad Arrow is unique and carries the number:

79/99
